JS J7 Proposed Joint Training Construct

Purpose:

Provide Functional COCOM Perspective on JS J7 DRAFT Re-engineering Joint Training Terms of Reference (TOR) Document.

(Dated 6 Dec 04, Action Folder: J-7A 00414-04)

USTRANSCOM concurred with comments

JS J7 TOR Problem Statement

- “Current focus is on Joint Exercises and not on a Joint Training continuum
- Training and simulation needs change across echelons (Tactical, Operational, Strategic)
- High Fidelity Tactical level simulations do not adequately address COCOM functionality
- COCOMs not resourced to conduct JTF.SJFHQ staff training
- Personnel arrive to Joint HQs untrained in Joint Operational Art

All Combatant Commands are Responsible for their "domain“. This responsibility includes but is not limited to training other COCOMS in their domain of expertise. For example no one can accurately replicate transportation and distribution for USTRANSCOM or force management for USJFCOM, Thus it is essential that the COCOMS be resourced to provide this domain knowledge to the entire joint

TC AoA Findings

- TC AoA examined the training construct and concluded
- **“**Little resources being targeted/tailored to the COCOMs’ in-theater requirements for:
  - COCOM staff
  - Standing Joint Force Headquarters (SJFHQ)
  - Joint Task Force (JTF) and
  - Functional component joint training.
- Most of the time, money and training tools were focused at the Service oriented tactical/interoperability level**”**

COCOMs Need an “In-House” Training Capability

DCOM "In House" Training Must Satisfy COCOM Challenges

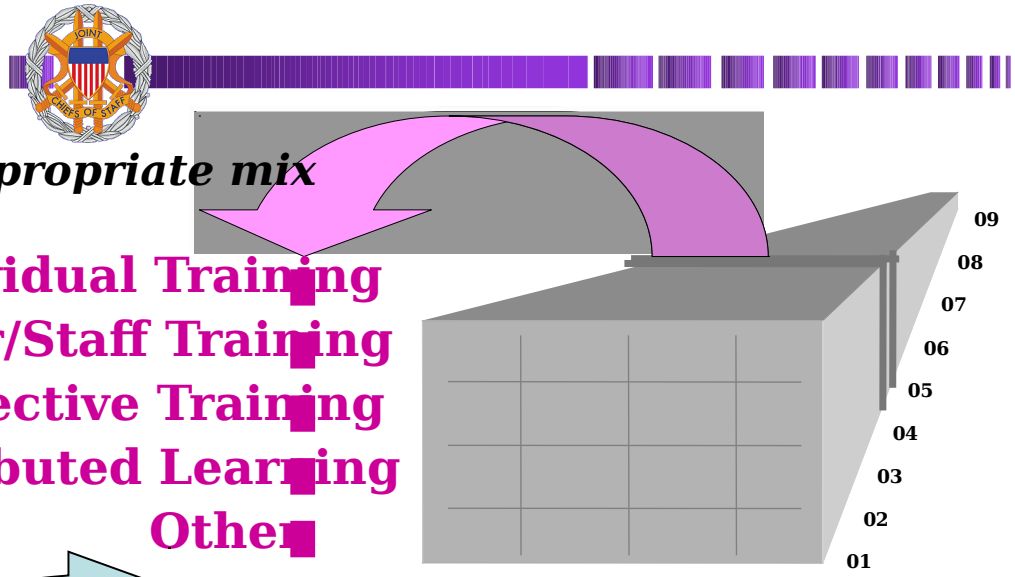
Challenges

These are the types of questions the continuum must answ

What is the training track for a JTF commander?
What is the training track for a joint planner?
What is the training track for a joint logistician?
What is the training track for a COCOM Crisis Action
What is the training track for a JFACC/JFLCC?
What is the training track for CSJTFs/JTFs

What are my requirements to replicate skill sets from outside my Command?

Continuum Gate Requirements



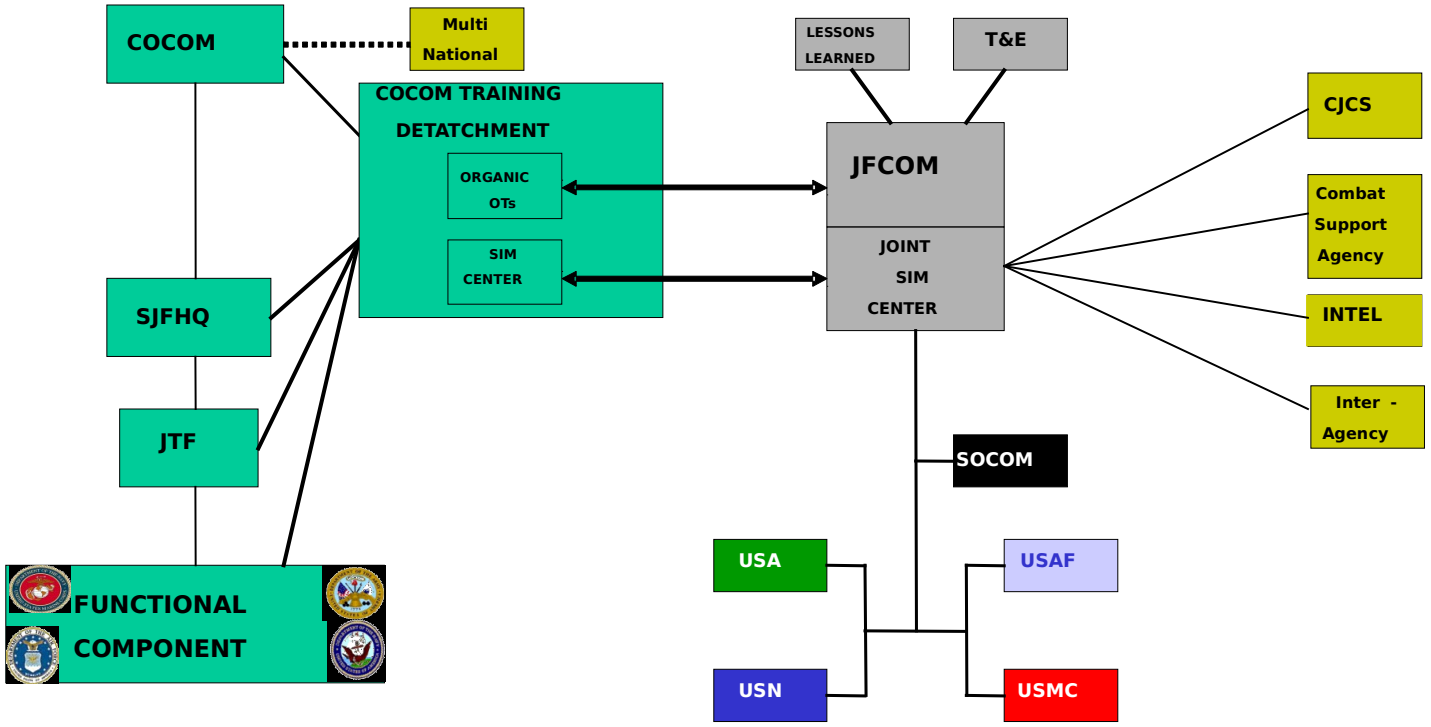
Trained and certified to joint standards at each way p

Organizational Development

COCOM staffs and leadership need regular experience in effectively utilizing the assets available to them at the Strategic National (SN) level.

Supporting COCOMS need to fully understand the requirements, conditions and personalities of the Geographical COCOMS.

JS Proposed Joint Training Construct



COCOMs given an organic training/simulation capability capability; JFCOM produces simulation standards / tools and exercise integration/coordination/facilitation support
